Corporate Inclusion Program Overview (SAMPLE)

SAMPLE DOCUMENT FOR EVALUATION. Illustrative demo content, not official STRENTOR material.

Purpose

The corporate program helps organizations build wheelchair-first inclusion and wellbeing. It combines awareness workshops with adaptive fitness sessions that employees of all abilities can join.

How a corporate program is designed

There is no fixed list of modules. Content is decided after STRENTOR understands the organization's requirements, so every program is scoped per client.

Step 1: Requirements conversation. STRENTOR and the organization discuss goals, team size, location and budget.

Step 2: Program design. STRENTOR proposes workshop and adaptive-session content that fits those requirements.

Delivery and measurement

Step 3: Delivery. Sessions can be delivered online or at the client site, depending on the region.

Step 4: Measurement. Participation and feedback are collected so the organization can see engagement.

Next steps

Organizations interested in the corporate program should contact STRENTOR to discuss scope. Corporate program pricing is not published.
